

Guide for writing HTML for Dart Editor

Bold (B):

- Shortcut: **Cmd+B / Ctrl+B**
- PDF Output: Renders as **** (Heavy font weight).
- Code: **bold text..**

Italic (I):

- Shortcut: **Cmd+I / Ctrl+I**
- PDF Output: Renders as **
- Code: **Italic text..**

Underline (U):

- Shortcut: **Cmd+U / Ctrl+U**
- PDF Output: Renders as <u>
- Code: **<u>Italic text..</u>**

Headings (H1 - H3):

Headings provide the document hierarchy. Note that for specific "Section Headers" (like the gray bar), you should use the Section Header button.

- Usage:
 - H1: Main Document Titles (e.g., "MEDICAL EVALUATION REPORT").
 - H2: Major Divisions (e.g., "Patient History").
 - H3: Sub-sections.
- PDF Output:
 - Renders larger, bold text.
 - Note: Our backend styling adds specific margin-top and margin-bottom to headings to ensure the document doesn't look cramped.

Example HTML:

```
<h1>Confidential Report</h1>
<h2>History of Present Illness</h2>
```

For Empty line or for Normal line :

Code:

- For empty line: **<p></p>**
- For Normal line : **<p> some text... </p>**

Note: If you think the spacing between lines is too much then use `<span>Text</span></br>` pattern.

Section header:

Code:

```
<pre>Subjective</pre>
```

Output:

Subjective

Tables (`<table>`, `<tr>`, `<th>`):

Tables are the backbone of structured data in our reports.

A. The Elements

- `<table>`: The main container. Our PDF generator ensures it defaults to full width (`width: 100%`).
- `<tr>` (Table Row): The horizontal container for a line of data.
- `<th>` (Table Header): Used for the top row of a data table.
 - **Styling:** Renders with a **Light Gray Background** and **Bold Text** to distinguish it from data.
 - **Usage:** Use for column titles like "Date", "Diagnosis", "Code".
- `<td>` (Table Data): The standard cell for body content.

B. Standard Data Table

Used for lists of data (e.g., Medications, Visit Logs).

- **Appearance:** Visible light gray borders around every cell.
- **Header Row:** The first row uses `<th>` cells.

Example HTML Code:

```
<table>
  <tr>
    <th>Date</th>
    <th>Diagnosis Code</th>
    <th>Description</th>
  </tr>
  <tr>
    <td>01/01/2024</td>
    <td>M54.5</td>
    <td>Low back pain</td>
  </tr>
</table>
```
